

## **SotaConnect Megastream**

Save up to 10% by ordering your Megastream private circuit from SotaConnect rather than BT, and benefit from reduced installation charges at the same time.

SotaConnect Megastream provides a range of high speed, permanently connected point-to-point private circuits that are available 24 hours a day, 365 days a year, without fail. SotaConnect Megastream is designed for businesses and organisations which need even more bandwidth than is available from [SotaConnect Kilostream](#).

SotaConnect Megastream is provided with exactly the same physical connection and service guarantees as a purchase direct from BT, but a valuable discount provides substantial savings year on year.

### **Bandwidth**

SotaConnect Megastream is provided in a range of different speeds from 2Mbps to 155Mbps, to suit the needs of any business or organisation with demanding bandwidth requirements. The options available are 2Mbps and 34Mbps, with a maximum speed of 155Mbps, providing extremely high-speed voice and data transmission for connecting corporate networks and multi-site telephone systems.

### **Scalability**

If more bandwidth is required, it is easy to upgrade to a faster option, or it is possible to install multiple SotaConnect Megastream services. For speeds beyond 155Mbps and up to 1Gbps [SotaConnect LES](#) and [SotaConnect Ethernet Services](#) can provide a cost-effective alternative.

### **Geographical Coverage**

Based on a consolidation of BT's SDH network and other national networks, geographical coverage of SotaConnect Megastream extends to over 99% of the UK.

### **Resilience**

With SotaConnect Megastream a resilient Genus option is usually available providing total physical separation and exchange independence for mission critical applications.

### **Service Level Agreement**

With SotaConnect Megastream an enhanced maintenance service is provided within the tariff which means that for no extra cost, there is the peace of mind of a guaranteed fault response time of 4 hours, any time of the day or night. Reliability comes as standard. With the service level agreement provided a resilient and high quality connection can be expected, achieving an average network performance target of 99.95% error free seconds per year.

### **Pricing**

The SotaConnect pricing tool means a fast and efficient response to pricing requests for any point-to-point connectivity requirement in the UK. We will automatically select the most cost-effective network in any particular geographical region, and where appropriate we will provide other cost-effective options.

As a guideline, SotaConnect Megastream services are typically provided at 10% below BT pricing for the identical product. Please call for pricing. We aim to respond faster than any other provider can.

For customers with existing BT Megastream services, instant annual cost savings can be achieved via the [SotaConnect Novation](#) service.

## **About SotaConnect**

SotaConnect is a portfolio of best-value voice, data and Internet services, including wide-area infrastructure and business continuity services for small, medium and large enterprises, public sector organisations, and other service providers.

The nerve-centre of SotaConnect is a state-of-the-art data centre located in the Kent countryside just 40 miles from Central London, within a highly secure, ring-fenced research centre. The SotaConnect Data Centre is located at the juncture of two international fibre optic networks, providing the highest level of resilient connectivity and virtually unlimited bandwidth.

The SotaConnect Data Centre is the regional presence of an established, high performance, and technically innovative, national network owned by a £4bn blue chip corporation. It is the first and only Ethernet point-of-presence (POP) in Kent which can provide national Ethernet services at speeds up to one Gigabit per second.

The SotaConnect POP is integrated with a national network of over 70 Ethernet POP's managed by Neos - an established subsidiary of Scottish & Southern Energy Plc. Gigabit Ethernet connectivity to London provides SotaConnect with direct access to some of the world's largest Internet backbones.

SotaConnect compliments a comprehensive portfolio of integration services which have been provided by [Sota Solutions Ltd](#) since 1988.
